DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19 and 21-27 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The Board Decision of 04/07/2010 reversed the Examiner's rejection. The Board found:

Due to the fact that Sloane's system uses a bar code scanner, there would be no reason for Sloane's system to verify that the product scanned is the actual product present in the customer-storage area since a promotional message for a complimentary product is sent as soon as the customer scans the product (FF 6), not after it has been cross-referenced in the customer-storage area by an item evaluator, as required by Appellants' claims. Thus, since a bar code reads the actual bar code on the product, it does not possess the same inherent characteristics of a RFID tag which would require cross referencing a product to verify that the product is actually present within the customer-storage area as opposed to on a nearby shelf or in another customer's cart within range of the customer's RFID tag reader. Rather, we find that any video images obtained in Sloane are used to determine if a theft is occurring when a product is placed in the cart without scanning the item at all. (FF 3). Thus, we agree with Appellants' argument that Sloane fails to teach or suggest an item evaluator that cross-references a measurement of a physical parameter with the electronic tag data received from a hot product, as generally recited in independent claims 1 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
